Featured tiles: Majestic Slate in Smoke Gray, Federal Gray and Stone Red

Historically, natural slate is one of the most appealing roofing choices, combining unmatched durability with aesthetic appeal. The cost of natural slate, as well as its weight and difficulty in finding a qualified slate installer, often makes its use prohibitive. EcoStar LLC, the leading manufacturer of premium synthetic steep-slope roofing products, combines classic appeal with modern technology to offer the lightweight and affordable alternative – Majestic Slate.

Created with up to 80% recycled rubber and plastics, Majestic Slate offers a sustainable, lighter and easy-to-install roofing product that provides the appearance of natural slate with lower application costs. Available in multiple widths and designer accents, this slate alternative offers endless possibilities for residential and commercial projects. The architectural detail of a project, whether historic or new construction, is further enhanced by a wide range of available color combinations using the palette of 12 standard color choices and array of custom options.

Majestic Slate Standard Colors

Color samples may not accurately represent the true color level or variations of color blends that will appear on the roof. Colors and specifications are subject to change without notice. EcoStar is not liable for color variations or shading.

Advantages

- Weighs 1/3 to 1/2 as much as natural slate
- Easy application keeps installation costs down
- Factory pre-blended for color & width
- Significant property insurance discounts may be available when upgrading or building a roof to protect against the elements

Architectural Flexibility

- Designer Series tiles can be blended together to add personal style to your home
- Available in 12 standard colors and factory blends
- Staggered and offset installations accentuate roof texture and depth
- Enhance the historical look in both residential and commercial buildings

Strength & Durability

- Provides superior durability and protection from extreme weather conditions that include wind, hail and wind driven rain
- Significant life cycle savings

Environmental Sustainability

- Manufactured with post-industrial recycled rubber and plastics (not tires)
